PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience architecting scalable, high-performance web systems and leading frontend engineering for enterprise clients including Motorola Solutions. Skilled in React ecosystems, microservices integration, and AI-assisted development workflows (Opencode, ChatGPT) to accelerate delivery without compromising code quality.

EXPERIENCE

Software Engineer (Frontend Systems Lead) — Digitize Solutions Pvt Ltd

Nov 2021 – Present

- Headed frontend systems architecture for an enterprise-scale Motorola Solutions platform for 3+ years, defining modular design patterns and data contracts between client and backend microservices.
- Architected integration of Threekit 3D configuration tools into a React ecosystem, managing complex data sync and asset-loading performance for a smoother user experience.
- Led a team of engineers, standardizing linting, automated unit testing, and CI/CD pipelines to maintain architectural integrity across distributed client applications.
- Leveraged AI coding assistants (Copilot, ChatGPT) across development, debugging, code review, and documentation to speed up delivery cycles.

Full Stack Developer — Global Garner Sales Service

Mar 2021 – Sep 2021

- Designed the architectural contract and API integration strategy (REST/GraphQL) between the UPOS mobile/web system and backend microservices.
- Built client-side data architecture and caching layers using Redux, reducing redundant network calls and improving responsiveness.
- Implemented unit testing protocols alongside React and Redux to improve application stability and reduce production bugs.

Product Developer — Nanotech Soft-App IT Solutions

Sep 2020 – Mar 2021

- Acted as lead developer for frontend initiatives, owning initial project architecture and core feature development.
- Built robust state management systems using React.js and Redux; collaborated daily with designers and engineers in an agile workflow.

Software Engineer — 75 Way Technology

Jan 2020 – Jul 2020

- Wrote maintainable code across a range of client projects using JavaScript, TypeScript, Vue.js, React, Angular, and Node.js.
- Collaborated daily with multi-disciplinary teams of engineers, designers, and clients.

PROJECTS

FitCoach — Personal Fitness & Workout Planner (<https://fitness-coach-79yi.onrender.com/>)

- Built a full-stack fitness web app with a searchable exercise library (filterable by category, equipment, and target muscle), video guides, nutrition tracking, and progress logging.
- Implemented an AI Coach feature for personalized workout guidance, integrating AI-assisted recommendations into the user flow.
- Designed and deployed the app end-to-end (frontend, backend, hosting on Render), demonstrating full ownership from architecture through deployment.

INTERNSHIPS

Full Stack Developer — 75 Susurla Impex Pvt. Ltd.

Aug 2019 – Sep 2019

PHP Developer — Ready To Go Pvt. Ltd.

Jul 2019 – Aug 2019

TECHNICAL SKILLS

Frontend: React.js, Vue.js (2/3), Angular, Redux, Vuex, JavaScript (ES6+), TypeScript, HTML5, CSS3, Threekit 3D

Backend & Database: Node.js, Laravel, CodeIgniter, PHP, AWS Lambda, MySQL, MongoDB

Engineering Practices: System Architecture, Unit Testing, CI/CD, Team Leadership, DSA & Competitive Programming

AI-Assisted Development: GitHub Copilot, ChatGPT, AI-assisted code generation, review, debugging, refactoring, prompt engineering

EDUCATION

B.Tech, Information Technology — Guru Jambheshwar University of Science & Technology, Hisar

Jul 2016 – Jun 2020

VOLUNTEERSHIP

Coordinator, Website Team — Training & Placement Cell, G.J.U.S.&T. *(Sep 2019 – Nov 2019)*
